Access Advisor shows the services that this role can access and when those services were last accessed. Review this data to remove unused permissions. [Learn More](#)

Allowed services (18)

Access Advisor reports activity for services and S3 management actions. To view actions, choose the service name from the list. Recent service activity usually appears within 4 hours. Service activity is reported for the past 400 days. [Learn More](#)

Last accessed information is available for S3 management actions.
